Overload capability

Rated current (LO) at 480V

Pulse frequency

Output frequency

Low Overload (LO)

110 % rated output current for 60 s, cycle time 300 s

High Overload (HO)

150 % rated output current for 60 s, cycle time 300 s

Connections

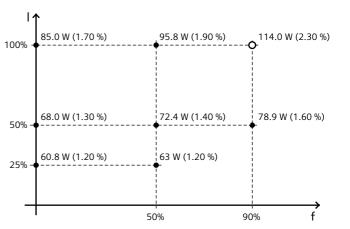

Max. motor cable length

| Shielded | 25 m (82 ft) | |
|------------|---------------|--|
| Unshielded | 50 m (164 ft) | |

Converter losses to IEC61800-9-2*

| Efficiency class | IE2 | |
|--|---------|--|
| Comparison with the reference converter (90% / | 22 60 % | |

Comparison with the reference converter (90% / 100%) 33.60 %

The percentage values show the losses in relation to the rated apparent power of the converter.

The diagram shows the losses for the points (as per standard IEC61800-9-2) of the relative torque generating current (I) over the relative motor stator frequency(f). The values are valid for the basic version of the converter without options/components.

^{*}converted values
